

Chronic Obstructive Pulmonary Diseases: Journal of the COPD Foundation

Chronic Obstructive Pulmonary Diseases: Journal of the COPD Foundation publishes original papers on any aspect of chronic obstructive pulmonary disease including basic science and human clinical studies. This is an open access, peer reviewed journal, published in electronic format. The Journal will have featured sections which will include:

- Basic Science
- Clinical/Translational Science
- Infections
- Exacerbations
- Bronchiectasis
- Drug and Device Development
- Biomarkers
- Genetics/Alpha-1
- Rehabilitation/Exercise/Physiology
- Interventional Procedures
- Comorbidities
- Epidemiology/Prevention
- Diagnostic Imaging
- Bronchiolitis Obliterans
- Environmental Exposures

Publication Schedule

Articles will be published online rapidly following peer review and editorial acceptance. Issues will be published quarterly with the first issue in May 2014, to coincide with the 10th Anniversary of the COPD Foundation.
