

COPD in the United States: How is Your State Doing?

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

Colorado has a lower burden of COPD but there is still room for improvement.

CULORADO

Colorado has lower than average COPD prevalence, hospitalization and readmission rates but the death and overall smoking rates are higher than average. It has higher than average influenza and pneumonia vaccination rates for people with COPD.

By the Numbers - COPD in Colorado

3.9% of adults have been diagnosed with COPD (prevalence)²

172,900 adults have been diagnosed with COPD (incidence)²

46.4 people out of every 100,000 die per year³

\$402 million is the annual cost for treatment4

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

Hospitalizations

\$2,870

per Medicare beneficiary with COPD4

30-day COPD readmission rate

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in Colorado with incomes less than \$15,000 are

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
