

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

Florida has a higher burden of COPD indicating there is significant room for improvement.

FLORIDA

Florida has high COPD prevalence, hospitalization, readmission and overall smoking rates but the death rate is somewhat lower than average. It has slightly higher than average influenza and pneumonia vaccination rates for people with COPD.

By the Numbers – COPD in Florida

6.2% of adults have been diagnosed with COPD (prevalence)²

1,163,100 adults have been diagnosed with COPD (incidence)²

37.2 people out of every 100,000 die per year³

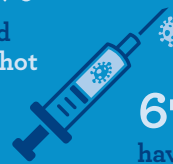

\$2.48 billion is the annual cost for treatment⁴

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

51.2% have had the flu shot

67.4% have had the pneumonia shot

Hospitalizations

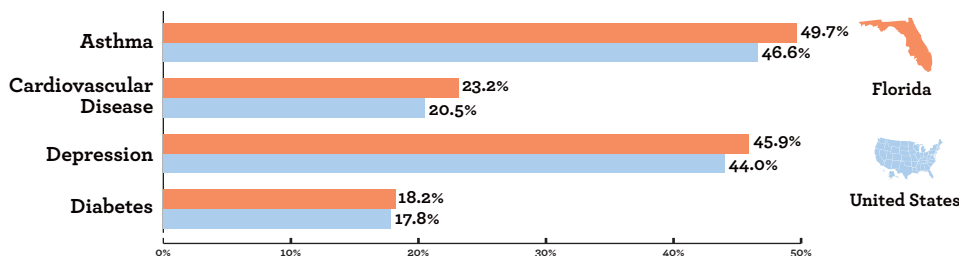

34,641 Medicare hospitalizations⁵

\$3,350 per Medicare beneficiary with COPD⁴

25.1% 30-day COPD readmission rate⁶

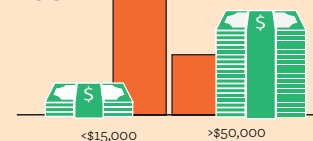

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in Florida with incomes less than \$15,000 are

4.3x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
