

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

Kentucky has a higher burden of COPD indicating there is significant room for improvement.

KENTUCKY

Kentucky has very high COPD prevalence, death, hospitalization, readmission and overall smoking rates. It has a lower than average influenza vaccination rate and a higher than average pneumonia vaccination rate for people with COPD.

By the Numbers – COPD in Kentucky

11.3% of adults have been diagnosed with COPD (prevalence)²

414,000 adults have been diagnosed with COPD (incidence)²

63.0 people out of every 100,000 die per year³

\$487 million is the annual cost for treatment⁴

Proportions of Women and Men that have COPD²

Vaccinations⁵

48.7% have had the flu shot

63.3% have had the pneumonia shot

Hospitalizations

7,896 Medicare hospitalizations⁵

\$3,090 per Medicare beneficiary with COPD⁴

24.0% 30-day COPD readmission rate⁶

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in Kentucky with incomes less than \$15,000 are

4.6x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
