

COPD in the United States: *How is Your State Doing?*

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

New Hampshire has an average burden of COPD but there is still significant room for improvement.

NEW HAMPSHIRE

New Hampshire's COPD prevalence equals the US average, the death and overall smoking rates are higher than average and the hospitalization and readmission rates are lower than average. It has higher than average influenza and pneumonia vaccination rates for people with COPD.

By the Numbers – COPD in New Hampshire

5.9% of adults have been diagnosed with COPD (prevalence)²

69,400 adults have been diagnosed with COPD (incidence)²

40.0 people out of every 100,000 die per year³

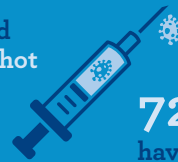

\$138 million is the annual cost for treatment⁴

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

55.4% have had the flu shot

72.4% have had the pneumonia shot

Hospitalizations

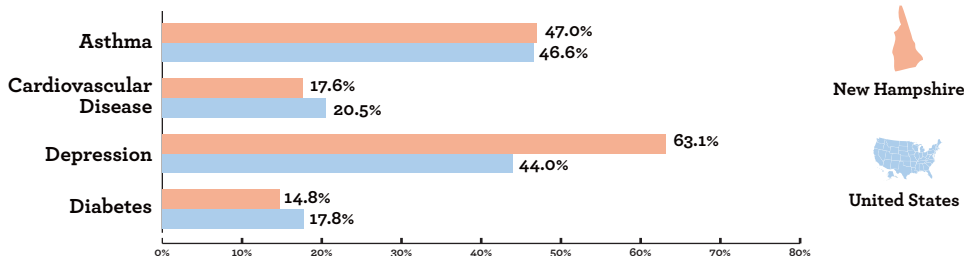

1,441 Medicare hospitalizations⁵

\$3,170 per Medicare beneficiary with COPD⁴

22.1% 30-day COPD readmission rate⁶

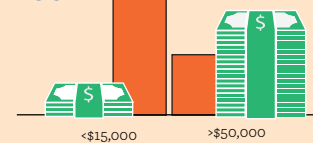

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in New Hampshire with incomes less than \$15,000 are

7.0x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
