

COPD in the United States: How is Your State Doing?

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

Pennsylvania has a higher burden of COPD indicating there is significant room for improvement.

PENNSYLVANIA

Pennsylvania has higher than average COPD prevalence, hospitalization, readmission and overall smoking rates but the death rate is slightly lower than average. It has a higher than average influenza vaccination rate and a lower than average pneumonia vaccination rate for people with COPD.

By the Numbers – COPD in Pennsylvania

6.1% of adults have been diagnosed with COPD (prevalence)²

693,800 adults have been diagnosed with COPD (incidence)²

36.2 people out of every 100,000 die per year³

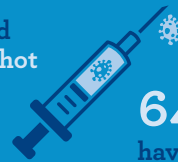

\$1.53 billion is the annual cost for treatment⁴

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

59.1% have had the flu shot

64.6% have had the pneumonia shot

Hospitalizations

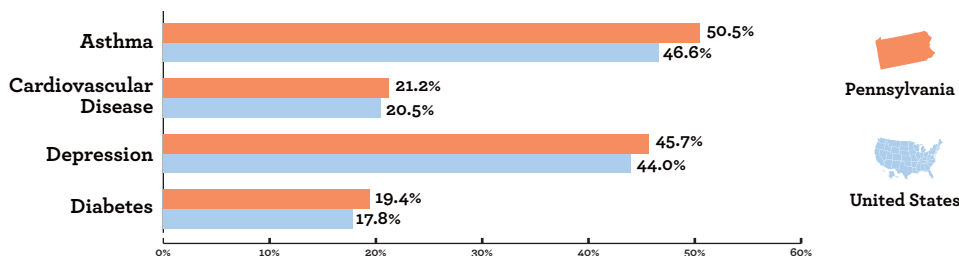

18,743 Medicare hospitalizations⁵

\$3,390 per Medicare beneficiary with COPD⁴

23.7% 30-day COPD readmission rate⁶

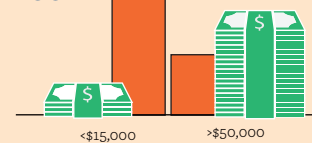

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in Pennsylvania with incomes less than \$15,000 are

4.3x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
