

COPD in the United States: *How is Your State Doing?*

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

South Dakota has a lower burden of COPD but there is still room for improvement.

SOUTH DAKOTA

South Dakota has lower than average COPD prevalence, hospitalization and readmission rates but its death and overall smoking rates are higher than average. It has a higher than average influenza vaccination rate and a lower than average pneumonia vaccination rate for people with COPD.

By the Numbers – COPD in South Dakota

5.1% of adults have been diagnosed with COPD (prevalence)²

36,400 adults have been diagnosed with COPD (incidence)²

42.0 people out of every 100,000 die per year³

\$100 million is the annual cost for treatment⁴

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

56.5% have had the flu shot

56.8% have had the pneumonia shot

Hospitalizations

624 Medicare hospitalizations⁵

\$3,290 per Medicare beneficiary with COPD⁴

19.5% 30-day COPD readmission rate⁶

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in South Dakota with incomes less than \$15,000 are

5.5x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
