

## A Look at COPD by State: 10 Key Metrics<sup>1</sup>

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

Tennessee has a higher burden of COPD indicating there is significant room for improvement.

# TENNESSEE

Tennessee has very high COPD prevalence, death, hospitalization, readmission and overall smoking rates. It has higher than average influenza and pneumonia vaccination rates for people with COPD.

## By the Numbers – COPD in Tennessee

**9.4%** of adults have been diagnosed with COPD (prevalence)<sup>2</sup>

**514,400** adults have been diagnosed with COPD (incidence)<sup>2</sup>

**52.5** people out of every 100,000 die per year<sup>3</sup>

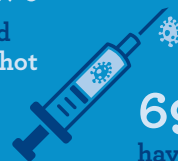

**\$794** million is the annual cost for treatment<sup>4</sup>

## Higher Proportions of Women than Men have COPD<sup>2</sup>

## Vaccinations<sup>5</sup>

**52.2%** have had the flu shot

**69.6%** have had the pneumonia shot

## Hospitalizations

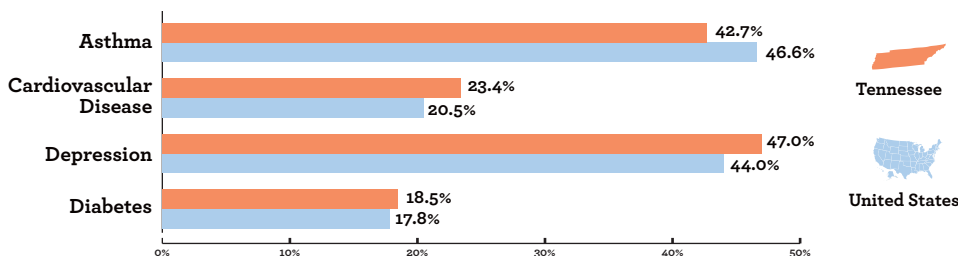

**10,048** Medicare hospitalizations<sup>5</sup>

**\$3,090** per Medicare beneficiary with COPD<sup>4</sup>

**23.5%** 30-day COPD readmission rate<sup>6</sup>

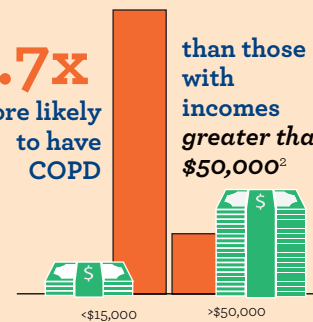

## COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.<sup>2</sup>

## Individuals in Tennessee with incomes less than \$15,000 are

**4.7x** more likely to have COPD than those with incomes greater than \$50,000<sup>2</sup>

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at [www.copdfoundation.org](http://www.copdfoundation.org).
