

COPD in the United States: *How is Your State Doing?*

A Look at COPD by State: 10 Key Metrics¹

States grouped based on performance in 10 key areas, 5 being worst and 1 being best.

The District of Columbia has an average burden of COPD but there is still significant room for improvement.

DISTRICT OF COLUMBIA

The District of Columbia has lower than average COPD prevalence, death and hospitalization rates but the overall smoking and readmission rates are higher than average. It has lower than average influenza and pneumonia vaccination rates for people with COPD.

By the Numbers – COPD in D.C.

5.7% of adults have been diagnosed with COPD (prevalence)²

29,700 adults have been diagnosed with COPD (incidence)²

21.0 people out of every 100,000 die per year³

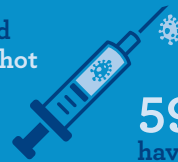

\$66 million is the annual cost for treatment⁴

Higher Proportions of Women than Men have COPD²

Vaccinations⁵

44.7% have had the flu shot

59.2% have had the pneumonia shot

Hospitalizations

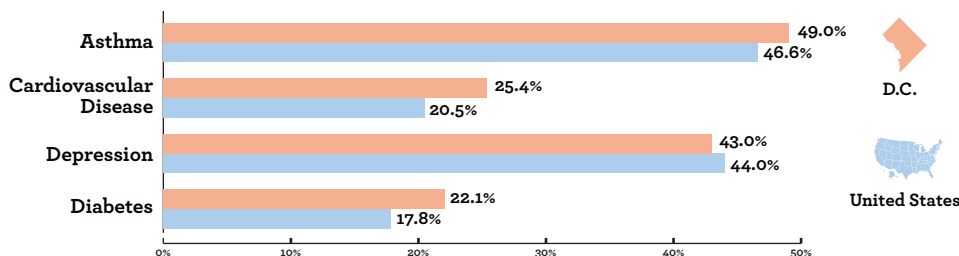

405 Medicare hospitalizations⁵

\$2,930 per Medicare beneficiary with COPD⁴

28.4% 30-day COPD readmission rate⁶

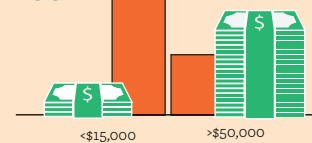

COPD and Chronic Diseases

Asthma, cardiovascular disease, depression and diabetes all have high prevalence rates in the COPD population, making earlier diagnosis, education and optimal treatment even more important.²

Individuals in D.C. with incomes less than \$15,000 are

5.8x more likely to have COPD than those with incomes greater than \$50,000²

Change starts with empowering individuals, families and the healthcare community to prevent the disease, diagnose it early and treat it appropriately. Find out more and get involved at www.copdfoundation.org.
